### SKILLS

Javascript

React.JS

CSS/HTML5

Responsive Design

### EDUCATION

#### G.B. Ferrigno

Commercial Technical Institute

2014-2020

I have completed Professional Education in Commercial Services, which equips me with operational support skills in administrative and commercial processes and promoting sales activities, including advertising. I specialize in Sales Services and possess competencies in organizing and managing sales activities and basic administrative duties.

Zero to Mastery Academy

Web development course, Udemy

2022/2023

I have acquired the necessary skills to excel in web development roles, including front-end, full-stack, web, and software development. The course provided hands-on experience in real-world web development projects and building a professional portfolio website. I possess expertise in fundamental and advanced concepts, preparing me for a career as a freelance web developer.

### PROFILE

I am interested in gaining experience in web development and have been self-teaching myself various front-end technologies such as HTML, CSS, JavaScript, and React. I have a passion for technology and am always eager to learn and stay up-to-date with the latest developments in the field.

I am always seeking opportunities to improve my skills and expand my knowledge base. I am a quick learner and have a proven ability to adapt to new environments and technologies. I am confident that my passion for web development and dedication to ongoing learning will make me a valuable addition to any team.

### WORK EXPERIENCE

#### Retail Assistant

Mediaworld

Oct/2022 - Dec/2022

As a retailer assistant at Mediaworld, I gained valuable experience in customer service and sales. I assisted customers with their inquiries and provided them with product information, ensuring their satisfaction. Additionally, I was responsible for managing inventory and organizing merchandise displays. Through my role, I honed my communication and organizational skills, as well as my ability to work well in a fast-paced environment. Overall, my time at Mediaworld provided me with a strong foundation in retail operations and customer service.

- Product knowledge
- Communication
- Problem-solving
- Time management
- Customer service

#### Personal Website

[Source Code - Github](#)

The single page website I have created is a biography showcasing my professional background and skills. It was written in HTML and CSS, and includes links to my social media accounts such as LinkedIn, Github, and Twitter. The layout is simple and easy to navigate, with clear sections for my personal information, education, work experience, and skills.

In order to enhance the functionality and interactivity of the website, I am planning to remake it using React.js. This will allow me to add more dynamic elements such as animation, interactive components, and real-time updates. I believe that by using React, I can create a more engaging and user-friendly website that better represents my personal brand and skills.

#### Project Smartbrain

[Source Code - Github](#)

This is a website written in React.js, it has 3 pages:

a Sign in page, a Register Page and a Image detector Api based Page (Clarifai)
